

Allfarm Probiotic Oat Flakes and Probiotic Fine Meal - vitamin, amino acid and live probiotic dietary supplements for poultry of all ages.

Gut health in a sprinkle!

Allfarm Probiotic dietary supplements contain baked oats coated with vitamins, amino acids and live probiotics. Each ingredient helps support gut flora, gut health, nutrition, and immune function. These products have been formulated and tested by veterinarians, and are unique product combinations.

The live bacteria and yeasts in Probiotic Flakes support a healthy gut microbiome, indirectly support immune function, and play a role in maintaining and supporting good digestive health. Active, digestive microflora have important roles which influence nutrient metabolism, immune function and nutrient absorption efficiency. Healthy gut flora are also known to inhibit the establishment of some pathogens. All ingredients in this formula are easily digested and adsorbed.

Birds enjoy the taste of these supplements. Known beneficial probiotic species (*Lactobacillus*, *Bifidobacterium*), fermented yeasts, hydrolysed amino acid and vitamins are adhered onto the natural glutens of the oats. This process makes the flakes attractive in smell and taste. Re-establishing a food eating pattern can be of key importance in stimulating appetite during disease recovery, and more importantly where a high level of easily digestible fibre and protein is helpful.

Which Allfarm Probiotic product should you use?

- **Allfarm Probiotic Oat Flakes** are for poultry over approximately four weeks of age, or when birds are large enough to consume rolled oat flakes. They are especially recommended for birds recovering from respiratory, gut and heat conditions, and may assist in revitalising the balance of gut flora after antibiotic therapy or diarrhoea. The vitamin and amino acid supplements support daily health and provide supplements where gut absorption may have been affected by disease conditions.
- **Allfarm Probiotic Fine Meal** is recommended for younger chicks, poults and game birds, from day-old, and uses an oat flour base. It provides a nutritional boost to younger birds and supports beneficial gut flora during development.

Ingredients:

Both products contain: Baked oat flakes or fine meal, sugars, salt, live probiotic strains of *Lactobacillus* & *Bifidobacterium*, Vitamin A, Vitamin D3, Vitamin E, Vitamin B1, Vitamin B2, Vitamin B6, Vitamin B12, Vitamin K, Nicotinic Acid, D-Pantothenic Acid, Inositol, L-Alanine, L-Arginine, L-Aspartic Acid, L-Cystine, L-Phenylalanine, L-Glutamic Acid, Glycine, L-Histidine, L-Isoleucine, L-Leucine, L-Lysine, DL-Methionine, L-Proline, L-Serine, L-Threonine, L-Tyrosine, L-Valine.

Shelf life:

Room temperature ($\leq 25^{\circ}\text{C}$): 6 months. Under refrigeration: 9 months.

Allfarm PROBIOTIC OAT FLAKES 120 g – 500 g

Allfarm PROBIOTIC FINE MEAL 120 g – 500 g

Directions:

Allfarm Probiotic Oat Flakes: Mix into enough feed to be eaten in a day, or sprinkle the flakes over a wide area so that all birds receive their share. Probiotics achieve best results when administered continuously. A daily top-up of friendly bacteria is more likely to have a longer term effect. When health is good and your birds have good bowel activity, with well-formed faeces, a weekly supplement may be all that is required. Always have fresh water available after every meal.

- **Feed Daily** – for best results, but especially if birds are experiencing health problems, after recent antibiotic treatment or after coccidiosis challenge. Supply at a rate of 1-2 scoops (10-20 g) per five birds per day (scoop included). **Allfarm Probiotic Flakes** are also safe enough to feed at higher rates, so if you have a single bird it's safe to feed it 1 scoop per day.
- **Feed Weekly** – optionally, when birds are healthy. Supply at a rate of 2 scoops (20 g) per five birds per week (scoop included).

Allfarm Probiotic Fine Meal: Mix into enough feed to be eaten in a day at a rate of 2 scoops (20 g) per 1 kg of feed. Probiotics achieve best results when administered continuously. Always have fresh water available after every meal.

- **Feed Daily** – from day-old.
- **Feed Weekly** – optionally, after 7-10 days of age, if birds are healthy.

Storage:

This product comes in a resealable bag. Always store the package in a dry location, away from direct sunlight, and ideally under refrigeration. Refrigeration is especially recommended once the seal is opened. Avoid condensation in or around the packaging, and ensure the product remains dry at all times. Always make sure that the product is in good condition, if stored after opening, and do not use if the product appears discoloured, or appears to contain fungus. Do not let the spoon become contaminated if it is left outside the bag.

Ordering:

Allfarm products may be ordered from our website: <https://www.allfarm.com.au>
or by telephone: (03) 5979 4488.
